

## TREVI BENNE PRODUCES EQUIPMENT FOR DEMOLITION RECYCLING FORESTRY AND EARTHMOVING MACHINES

### Mappa

□

 We began our journey 25 years ago. We were daring. Bold. Innovative. We never settled for less than the very best. We followed our instinct, looking into the future. In 25 years, we built upon the passion of one man, to create a Group. WE DARED TO DREAM BIGGER. WE JUST DID IT. SINCE 1992. Trevi Benne has been producing and marketing technologies and tools for earth moving equipment since 1992, dealing in three major product lines: equipment for demolition, handling and recycling manufacturing pulverizers, crushers, multi kit processors, shears for metal, screening and crushing buckets for the selection and the aggregate site remediation; full range of digging and loading buckets, standard and reinforced, for excavators and loaders, rear and front quick couplers. Line of special buckets, with profile on request, using the best materials and anti-wear packages for quarrying and mining industry for excavators up to 500 tons; a line dedicated to the forest sector for tree felling, cutting and volume reduction of logs, road and forest maintenance. Trevi Benne is present in over 50 different countries with a network of professional dealers, is a TÜV certified company for quality and is also active sponsor of the major Associations of National and European Demolishers. 25 years of history. 25 years of passion and commitment for our work. 25 years of sacrifices, challenges and success in the pursuit of innovation, dynamism and flexibility. 25 years of research, development and technological improvement. 25 years leading the way in Italy, Europe and the world. Trevi Benne S.p.A. Via Bergoncino, 18 - 36025, Noventa Vicentina (VI) Tel +39 0444 760773 - Fax +39 0444 861182info@trevibenne.it

### Descrizione

Since 1992, Trevi Benne has produced parts for earthmoving machinery in four main product lines: - demolition equipment created to destruct structures and buildings, to separate iron and cement material, to remove and reclaim inert material by producing crushers, clamps, multikits, iron shears, rail cutters, cutting buckets and crusher buckets to reclassify the area; - equipment for recycling, crushing and selecting inert materials, for the railway industry, recycling professionals and the scrap iron trade. Equipment for moving, transporting and positioning material of various kinds; - a full range of standard and reinforced buckets for excavators and loaders, quick front and rear coupling. Range of special buckets with a profile on request, with anti-wear equipment and increased thickness, designed for quarrying and mining excavators up to 500 tons; - a dedicated line for the forestry sector for cutting and reducing the volume of logs, felling and thinning trees, and forest and road maintenance. Trevi Benne is present in over 50 different countries with a network of professional dealers. It is a TÜV-certified company and it is also an active sponsor of the major National and European Associations of Demolishers. Link to connect to videos on youtube:
